★ fused - layer 项目流程:

① 夢子 fused-layer 方式, 给定output 及范围, 计算 input is 范围。

| 150 200 range = (1,150)
| Map: output range | 25 50 | Younge = (1,25)
| Map | Younge | (1,25)

②将ondput 年均分割成长份,则initial input 也将对应地进行分割处理。
